

Transmixer **HATOM 2** Is the answer to the request of a strong scissor-lift platform for low-profile tunnels which accomplishes all safety regulations. Its great mobility, small dimensions, working capacity, easy-to-use and the proven reliability of our equipment, give it unique features in the market.

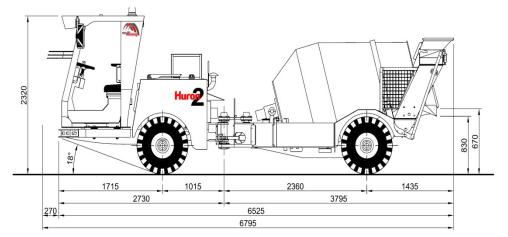

Its special configuration, with articulated chassis, its engine and its design, provides the strength and flexibility to work under the most extreme conditions, from extreme cold to tropical temperatures.

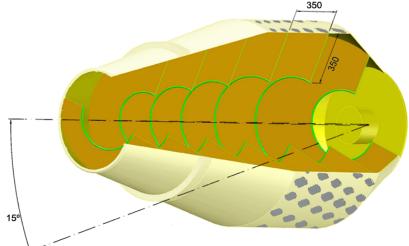

Transmixer **Huron 2** is equipped with all the elements to make easy a hard work: **Rotary driving place**, **ROPS-FOPS cabin**, **working lights**, **especial designed drum for transporting and mixing at the same time.** A full accessibility to high rotation **components**, make its use and maintenance not a loss of time, but, using it properly, the reason for a long-lasting and reliable unit. The powerful engine allows it to work **without loss of power up to 5,000 MASL** and to overcome slopes up to 30% full load.

The special internal design of the mixer allows the unit a mixture of dry mass, pouring the water from its own tanks for producing the concrete, or ready wet mix, giving unique smooth finishing features in its sector.

The unit has 2m³ output capacity of concrete, incorporating hydraulic drum cover as standard to avoid any loss during transport.

EASY TO TRASNPORT

In this global world, forwarding equipment in a fast and safe way has become a need and an obligatory feature. The use of trailers and containers help to deliver **Huron 2** anywhere in the world.
